GERMAN-INDIAN CONFERENCE

Data — big or small — is increasingly changing the
perception and reality of our cities. On the one side,
the opportunities look promising: better communi-
cation facilities, more efficient mobility and produc-
tion by means of data based infrastructure. On
the other side, we are facing various challenges and
insecurities: What are the consequences of data
based technology for the spatial, cultural and poli-
tical future realities of our cities? Who is using
or misusing data? Who benefits from data? How much
access to data do we have?

17.00 – 18.30 Pecha Kucha

POLITICS OF DATA — CHANGING
PERCEPTION AND DESIGN

Sumandro Chattapadhyay   *SARAI*
Marian Dörk   *Potsdam University of Applied Sciences*
Johannes Dumpe   *OpenBerlin*
Tile von Damm   *MOD Institute*
Maya Indira Ganesh   *Tactical Technology Network*
Jens Herrmann   *d'cent*
Martin Kohler   *HCU Hamburg*
Christof Mayer   *Raumlabor*
Ines-Ulrike Rudolph   *TX-Architekten*
Frederik Wegener   *Liquid Democracy*

19.00 Keynote

THE QUESTIONS WE
DON'T ASK OF DATA

Bharath Palavalli
Fields of View, Bangalore

Discussion with Jörg Stollmann, *TU Berlin*
und Anne-Katrin Fenk, *MOD Institute*

20.30 Apéro
